

THE POWER OF THE PACK

Protection Through Collective Intelligence

Who we are

CyberSift transforms complex security signals into clear, strategic intelligence. Born from a fusion of research and real-world cybersecurity expertise, we turn advanced AI into protection that is accessible, adaptive and built for resilience.

We don't just protect systems - we protect reputation, continuity and growth.

OUR VISION

To make cybersecurity accessible to everyone.

Our philosophy

Collective intelligence

Protection is not about standing alone - it's about standing together. Like in nature, where every instinct contributes to survival, our technology learns, adapts and protects as one.

Why Cybersift

- **Unified visibility:** One intelligent ecosystem that connects exposure, detection and response for complete clarity.
- **Flexible by design:** Our technology and our team adapt to each organisation's reality and needs.
- **Trusted relationships:** Clients stay with us for years because we care, we listen, and we show up when it matters.
- **Support that stays close:** We operate as an extension of your team, responsive, consistent, and genuinely invested in your security.
- **Technology that goes beyond:** Advanced AI, continuous improvements and a mindset that always pushes one step ahead of evolving threats.
- **Strength through collective intelligence:** Every layer, every signal and every person working together delivering protection that grows stronger as a whole.

Products

SENTIO - SIEM

CyberSift's SIEM system integrates SIM and SEM functionalities, excelling in data collection, analysis, and correlation from diverse sources. It stands out with threat intelligence integration for enhanced detection. The system's adaptability and user-friendly interface empower organizations to customize defense strategies, ensuring comprehensive visibility and robust cybersecurity across their environment.

TUTELA – Vulnerability Assessment Platform

TUTELA, is an all-encompassing security solution centered around vulnerability scanning and compliance. With our proprietary in-house solution, users can conduct thorough network scans, detecting phishing attempts, data leaks, vulnerabilities, and potential threats with unparalleled efficiency. TUTELA seamlessly scans your infrastructure, fortifying your assets and ensuring robust security measures are in place.

CyberSift DRIVE

CyberSift Drive is a secure file transfer solution designed for businesses, offering seamless access, sharing, and synchronization of files. It features a dedicated portal that integrates smoothly with existing infrastructure and storage systems, enabling quick deployment. The user-friendly interface and hybrid cloud approach ensure universal access to data, regardless of its location.

CyberSift DNS Protect

CyberSift DNS Protect is a platform designed to secure networks and prevent threats while browsing the internet, offering effective protection against phishing, malware, and advertising tracking, allowing users to manage access to selected content categories for a secure and focused online environment. With a user-friendly interface and comprehensive features, it simplifies security measures and provides protection against DNS-based cyberattacks, enabling monitoring of network functions with over 80+ categories for filtering content, enhancing security and productivity in online environments.

Services

Managed Security

CyberSift offers comprehensive Managed Security Services (MSSP) to mitigate security challenges effectively. With a focus on experience and loyalty, CyberSift's seasoned analysts and SOC team provide tailored cybersecurity solutions to address unique organizational needs. By partnering with renowned security firms CyberSift ensures robust defense mechanisms to safeguard businesses, enhance security posture, and protect business reputation, without the need for extensive internal hiring, making cybersecurity management seamless and efficient.

SOC Monitoring

CyberSift's SOC Monitoring service offers organizations a centralized hub for vigilant cybersecurity monitoring and management. By leveraging advanced technologies like SIEM systems and a skilled cybersecurity team, CyberSift ensures real-time detection, analysis, and response to security incidents and threats. This service provides continuous surveillance, proactive vulnerability identification, and swift response measures to mitigate risks and breaches, ultimately enhancing organizations' overall security posture and delivering comprehensive cybersecurity solutions.

Penetration Testing

Our comprehensive penetration testing methodology integrates advanced tools to provide a nuanced understanding of the threat landscape. This approach goes beyond identifying vulnerabilities to effectively detect and analyze potential cyber threats. Clients receive detailed analyses, including impact assessments, risk evaluations, root cause identification, and strategic recommendations at process and policy levels.

Security Training

CyberSift offers comprehensive end-user security awareness training to transform employees into a robust last line of defense against cyber threats. The goal is to empower staff with the knowledge and skills to identify, prevent, and respond to potential attacks, safeguarding the organization.

Compliance

CyberSift offers organizations comprehensive assistance in managing and securing compliance with industry standards such as ISO 27001. The cybersecurity management services are designed to guide businesses through the process of achieving compliance, starting from conducting thorough risk assessments to implementing tailored policies, ensuring effective communication and adherence to policies by employees, and continuously monitoring and updating compliance measures as regulations evolve.
